DATE OF INFO: 1 - 18 Nov 53

25X1X6

SOURCE: [REDACTED]

1. Available on loan from the CIA Library are lists of Soviet subscribers to publications of the American Chemical Society. These subscriptions were received between 1 -18 Nov 53 and are not out of the ordinary regarding selection or numbers of copies. The only difference from previous years is that we received a letter during the summer [1953] from the Central Purchasing Bureau in Moscow asking whether orders could be placed directly rather than through the US organizations used in the past. When we replied in the affirmative nothing further was received until the direct order slips. There may be additional subscriptions in the future since these appear to be only from major cities.
2. The code to be used in identifying the individual publications is as follows:

J - Journal of the American Chemical Society  
C - Chemical Abstracts (with annual index)  
I - Industrial and Engineering Chemistry  
A - Analytical Chemistry  
N - Chemical and Engineering News  
H - Journal of Physical Chemistry  
F - Journal of Agricultural and Food Chemistry  
B - Chemical Abstracts (without annual index)
